

## **Hillbilly Terrain UK replacement Module**

**Note: The L.E.D's on the handle no longer operate and A single press on the distance button will now cancel the EDF operation.**

- 1. Remove cover from old controller (retaining all 6 screws for fitting of the new controller).**
- 2. Remove all cables from PCB and discard old box.**
- 3. Cut off 8 way plug from handle cable and retain RED, BLACK & PURPLE wires.**
- 4. Strip back these wires by 6 mm & feed the cable through the grommet of the new controller module and screw the stripped wires into the 3 way terminal block on PCB (see diagram).**
- 5 Fit Motor and Battery leads onto spade fittings on PCB (see diagram).**
- 6. Fit lid onto controller module with 4 screws provided.**
- 7. Fit back plate from original Module onto new controller Module and screw onto battery tray using original screws saved.**
- 8. Add wire link to PCB in the handle of trolley as per diagram.**
